Subject: Re: Class VI Upload Data Confidentiality Question

Hi Wayne, let me look into this matter and get back to you. We certainly are able to properly handle CBI with our non-Class VI permits, so there must be a provision for doing so with Class VI as well.

David,

In assisting Clean Energy Systems prepare the Pre-construction Class VI application we are using some well log data and seismic data under license from data brokers, such as IHS. The license agreements specify that we are not allowed to show data or derivatives to third parties via Internet. We are explaining the application process to the data brokers and I think it would be helpful for us to be able to convey if the images, tables and figures that are included in the narrative and various attachments are public documents, if they can be kept confidential and what needs to be done to be in compliance with the license terms. Would it be possible to have a call with you or someone on your team to provide some clarity on this question?

Regards,
Wayne
